

BASIC PPE REQUIREMENT

Company / contractor should provide Personal Protective Equipment (PPE) to employees doing specific jobs, in order to protect them from injury or body harm.

Type of PPE are dependent on the risks / hazards that the staff will be exposed to at site and in certain cases specific requirement by the client or tenant on the PPE must also be met.

Only approved and valid PPE shall be worn at the work site.

- Wearing **SPECIFIC** PPE when working.
- PPE can be divided into several categories:

1. Faces and eyes,
2. Head,
3. Respiratory,
4. Body including hand, feet and fall protection system.

REQUIRED PPE IN WMC	
	 SAFETY HELMET
	 SAFETY GLASS
	 RESPIRATOR
	 JACKET & PANTS
	 SAFETY BOOTS

Below is a sample of potential hazards and proposed PPE to be used:

No	POTENTIAL HAZARD	HARD HAT	SAFETY SHOE	SAFETY HARNESS	SAFETY VEST	BREATHING MASK
1	Falling objects from above and head exposure to hard surfaces.					
2	Expose to sharps nails or objects on the floor and fall of heavy things on foot.					
3	Working at height or more than 2 meters from ground or immediate level where there are no guardrails and potential risks of falling.					
4	Working on highway "live traffic" road, highway or railway track.					
5	Working outdoor during haze with significant hazards to breathing for example in tunnel
